INTERSCHOLASTIC ATHLETICS

Statement of Policy:

The purpose of interscholastic athletics is to promote healthy lifestyles for our students, teach lessons learned from hard work and dedication, as well as to allow students to experience losing with dignity and winning with class.

The school board, in conjunction with the superintendent and building administration, will offer an interscholastic athletic program that enhances the academic programs of the schools. Taking into consideration budgetary restrictions, student demand, and available playing space, the program will encourage as many students as possible to participate.

Participation in interscholastic athletics is governed by statewide or local associations developed and run for that purpose. For high school athletics, this will generally be the New Hampshire Interscholastic Athletic Association. For middle school competition, this will generally be the Tri-County League. All student athletes must maintain eligibility based on the rules of those organizations.

All student athletes must also maintain eligibility based on the requirements of the school as established by administration at each level. These will generally follow those of the governing bodies, with building administration empowered to enforce policies that promote safety among student-athletes for conduct during and after school and team hours. School administrators may also develop, publish, and hold students to higher academic standards than the governing bodies require.
